

THRIFT KOTE FORM RELEASE

Symons

THRIFT KOTE is a chemically reactive form release in a hydrocarbon carrier. It is water insoluble, containing no paraffin or silicone. THRIFT KOTE is available in standard and cherry-scented formulations. The cherry scent disguises the odor and reduces worker complaints, especially in confined areas.

CAST-OFF FORM RELEASE

Degussa Building Systems

Nonstaining form-release agents; Features: forms a water-resistant chemical barrier; compatible with conventional mix designs; no residue transfer to concrete surface; does not attack wood fibers; reduces rust on steel forms and equipment; protects aluminum from concrete and plaster; use directly from container; placement up to 5 weeks before concrete; VOC compliant.

NOX-CRETE FORM COATING

Nox-Crete

Nox-Crete Form Coating chemically reacts instantly upon contact with fresh concrete, positively preventing bonding with the form surface. Byproducts of this chemical reaction waterproof wood forms, greatly extending their useful life. Reacts with steel forms to produce iron soaps, minimizing the formation of rust.

DUOGARD V.O.C. CONCRETE FORM RELEASE AGENT **WR Meadows**

DUOGARD Multi-Reactive Form Release is composed of an organic chemical that reacts with the alkali content of concrete to form a release film that effectively prevents the bonding of the concrete to the form. In addition, the product also contains a high molecular weight and a non-reactive, chemically inert ingredient to assist in clean, quick, form release and removal. These exclusive ingredients combine the effectiveness of a chemically reactive type and an inert barrier type to provide a doubly effective separation. DUOGARD meets maximum VOC content of 450 g/L for Form Release Compounds as required by the U.S. EPA Architectural Coatings Rule. The product will not stain or discolor concrete.

KLEEN KOTE WB FORM RELEASE CONCENTRATE **Progressive Construction**

KLEEN KOTE™ is a water-based industrial release that is V.O.C. compliant. It helps prevent asphalt, concrete, dirt and other debris from sticking to treated equipment, forms, hand tools and trucks. “KLEEN KOTE” is an innovative release that deposits a very thin film causing the surface to become virtually non-stick. “KLEEN KOTE” is environmentally safe and does not contain any solvents or phosphates.

ITEM # 334200 5 GAL PAIL

KLEEN KRETE W/TRIGGER SPRAYER

Progressive Construction

KLEEN KRETE™ is a unique liquid that has the ability to remove dry, hardened concrete from almost any surface. "KLEEN KRETE" is designed to eliminate the need for jackhammering, sandblasting and scraping of hardened concrete from equipment, forms and other items that may come in contact with concrete. "KLEEN KRETE" has the unique advantage of being biodegradable and equipment friendly. It will not harm chrome, electrical systems, paint, rubber and most other surfaces when used according to directions. It is packaged ready-to-use and needs only to be brushed or sprayed on to the concrete that is to be removed. Every 1 Gal. bottle includes a 36" trigger sprayer.

Q-2 FORM RELEASE

Unitex

A chemical release for concrete forms that effectively prevent bonding of concrete to steel, aluminum, plywood and composite forms. Composed of organic chemicals that react with the concrete to prevent adhesion and provide a quick and easy release. Pleasantly scented and free of kerosene, Q-2 FORM RELEASE is a thin amber liquid that remains fluid at subfreezing temperatures and can be stored indefinitely. VOC-compliant, pleasantly scented
