

SPRAY GUNS & ACCESSORIES

P10002 12 OZ EX EXPANDING PU FOAM SEALANT (12CS)

Handi-Foam® Polyurethane Foam is a multiple purpose, UL classified one-component polyurethane foam designed within the international guide-lines for protection of the ozone layer. It is designed for easy dispensing through the straw adapter included with each can.

Application Areas

Apply Handi-Foam, one-component foam onto any clean surface to fill, insulate and seal around gaps, beneath base plates, mud sills, top plate penetrations, corner joints, T-joints, exterior cracks, around utility panels, pipes, duct penetrations, etc. It is specifically designed to be dispensed as a bead for filling cracks, crevices, and to fill smaller cavities.

Properties

The pre-pressurized, portable one-component foam system, applied in a bead form, expands and cures slowly to a semi-rigid, closed cell foam upon reaction with moisture, such as ambient humidity.

Handi-Foam one-component foam dries tack-free in approximately 8-10 minutes or less depending on moisture and temperature conditions. Fully cures within 24 hours. Expansion of 2.3 times the dispensed bead within the first hour should be expected.

Handi-Foam one-component foam adheres to almost all building materials with the exception of surfaces such as polyethylene, Teflon®, silicone, oils and greases, mold release agents, and similar materials.

Handi-Foam Polyurethane Gun Foam

Fomo Products

Description

ITEM #	002008	P10115	24 OZ CAN
	002010	P10290	31 OZ. CAN
	002012	P10295	31 OZ. CAN (BLACK)

Handi-Foam Polyurethane Gun Foam is a multiple purpose UL classified one-component polyurethane foam de-signed within the international guidelines for protection of the ozone layer, and with respect to the Montreal Protocol, 1987 and other environmental guidelines, utilizing a non-flammable blowing agent to assist in the safety of the end user. It is designed to be dispensed through any of the professional one-component dispensing units specifically designed for dispensing Handi-Foam Polyurethane Gun Foam.

Application Areas

Handi-Foam Gun Foam is engineered for a clean and metered application of one-component polyurethane foam. Handi-Foam Polyurethane Gun Foam is used for filling and sealing of joints, insulating and filling in wall gaps and cavities and sticking and joining of insulation panels. Dispensing units are specifically designed to dispense a controllable bead with minimum waste and easy cleaning for filling cracks, crevices, and smaller cavities on flat or irregular surfaces.

Properties

Handi-Foam Polyurethane Gun Foam dries tack-free within 10 minutes, is cuttable in 1 hour and fully cured in 12-24 hours depending on moisture and temperature conditions.

Handi-Foam Polyurethane Gun Foam adheres to almost all building materials with the exception of surfaces such as polyurethane, Teflon(r), silicone, oils and greases, mold release agents, and similar materials.

2209 PLASTIC SPRAYER

Chapin Manufacturing

Industrial Heavy-Duty Style, Polyethylene Unit - 3 Gallon / 11.4 Liter.

NEW - 4-1/2" wide opening for easy filling and cleaning.

NEW - Easy Disconnect / safety Lock features quick access for cleaning and repair.

NEW - Actual capacity tanks.

Brass plated shut-off has lock-on feature for continuous spraying.

36" heavy duty nylon reinforced hose to resist chemicals.

18" curved brass extension for easier reach.

Brass fan tip nozzle. (.50 GPM)

Serviceable poly pump.

Built-in relief valve and pressure gauge.

ITEM # 338652

SPRAYER PARTS/ACCESSORIES

Chapin Sprayer Parts & Accessories

Chapin Manufacturing

Stetson Building Products stocks a variety of replacements parts and accessories for their Chapin sprayers.

Nozzles, Gaskets, Brass Fan Tips, Repair Kits, and Hoses. Please give us a call for your repair needs.
